PROFILE

Full stack developer with **6+ years of experience** (since 2020) building production web apps, React Native mobile apps and the APIs behind them, mostly remotely for startups in Canada and Zambia. I've led development on a customer loyalty platform, led a mobile team through a Swift-to-React-Native rebuild, and split a GIS billing platform into independently deployed products. I own features end to end, from database and API to app store release, and use AI tooling deliberately to move faster without lowering the bar on review.

EXPERIENCE

KINDO | MapBilling

Full Stack Developer · Kindo Advertising Limited

Sep 2025 – **Present**

Remote · Part-time · Zambia

- One of two core developers on **MapBilling**, a GIS-powered platform for water utilities, waste collectors and real estate agencies, with web dashboards, field apps and customer payment apps.
- Split a shared **NestJS** backend and **React** web app into separate water, waste and real estate apps, each with its own **PostgreSQL** database (Prisma) and **Cloud Build** pipeline to **Google Cloud Run**; wrote the per-product data migration tool.
- Built Map Estates features: buyer sales stages, property notes and attachments, and a public **Mapbox** property map with nearby listings and directions.
- Hardened authentication and token refresh, sped up the heaviest list endpoints, seeded the **Playwright** end-to-end test server, and contributed to the **Expo** apps.
- Built a **Claude Code** multi-agent workflow: the main model plans and reviews, smaller models implement from written specs, tasks are routed by measured cost, and money, auth, schema and deploy work stays under direct review.

sticky

Full Stack Developer · Stickycards Co.

Jan 2025 – Feb 2026

Remote · Canada

- **Led development** of a customer service tool with real-time chat and third-party integrations, powering a customer loyalty program.
- Architected and maintained the **NestJS** backend and **React + TypeScript** frontend; built the customer analytics and loyalty dashboard.
- Cut message latency by **40%** with **Socket.io**, and raised user engagement by **25%** with a responsive **Tailwind CSS** UI.

BPTN BLACK PROFESSIONALS IN TECH NETWORK | OBSIDI®

Full Stack Mobile Developer · BPTN

Aug 2022 – Jan 2025

Remote · Canada

- Built core features of the **OBSIDI** career and mentorship app for iOS and Android (**5K+ downloads**) in **React Native**, using custom hooks to keep logic out of screens.
- Kept the UX consistent across platforms with **styled-components**; cut code duplication by **35%**.
- Coordinated App Store and Google Play releases, release cycles and A/B tests.

Live: Web · iOS · Android

Lendbox

Mobile Developer · Lendbox

Jun 2022 – Aug 2022

On-site · Lusaka, Zambia · Part-time

- Full stack mobile development on **Lendbox**, an AI-powered loan management platform for lenders and microfinance institutions (web, Android and iOS).

- Worked in the on-site product team using **Sentry** for error monitoring and **Asana** for delivery.

Spark&Spur | Propzi

Full Stack Developer · SparknSpur Co.

Oct 2020 – May 2022

Remote · Canada

- **Led the mobile team** rebuilding **Propzi**, moving from Swift to **React Native** and halving codebase maintenance.
- Built and deployed a **Django** machine-learning service for real estate price prediction, handling **10K+** API requests a day.
- Built Sparky, an embeddable real-time chat widget (React, Webpack, Babel, Node/NestJS) running on **500+** partner sites with **<100 ms** delivery over Socket.io.
- Mentored junior developers on React Native best practices and code review.

Live: propzi.com

Full Stack Developer · Multinet

Jul 2020 – Oct 2020

Remote

- Built a VoIP mobile app combining chat with cell-network calling: prototyped in React Native, then rebuilt in **Kotlin** for SIP trunking, with a **Node.js** backend for call routing and users, supporting 100+ concurrent users.

Greenwebb

Full Stack Developer · GreenWebb

Jan 2020 – Jul 2020

Startup

- Built a **PHP/MySQL** web app with authentication and data management, a mobile-first frontend, and Orgsocial, a native **Android** messaging app (Java, Firebase).

FREELANCE · UPWORK

Short fixed-price contracts in 2022 and 2025. 5 completed, rated 4.4–5.0 where reviewed.

- First version of a **NestJS** backend for a client product, and updates to an existing **React** web app (2025).
- An API endpoint test suite with **Mocha** and **Chai**, **React Native** features for an education app, and a **Node.js** service syncing two distributed data stores (2022).

SKILLS

Frontend	React, Next.js, TypeScript, Vue.js, Tailwind CSS, styled-components, Mapbox GL, Webpack, Vite
Backend	Node.js, NestJS, Express, Django, GraphQL (Apollo), REST, Socket.io, PHP, microservices
Mobile	React Native, Expo, Swift/SwiftUI, Kotlin, Java, App Store and Google Play releases
Data & GIS	PostgreSQL, Prisma, MongoDB, Redis, Firebase (Firestore, Realtime DB, Cloud Functions), Turf.js, GeoJSON
Cloud & DevOps	Google Cloud (Cloud Run, Cloud Build, Cloud SQL), AWS (EC2, Lambda, S3, RDS), Docker, Nginx, Linux, CI/CD
Testing	Jest, Vitest, Playwright, Cypress, Mocha, Chai
AI tooling	Claude Code (Opus, Sonnet, Haiku), custom subagents and skills, git worktrees
Systems	Rust, C/C++

EDUCATION

FIA Diploma in Accountancy & Business
Zabtuc College of Business · 2019

JavaScript Algorithms & Data Structures
freeCodeCamp · 2020 · 300 hours

Responsive Web Design
freeCodeCamp · 2020

Munali Secondary School
2012 – 2014

OFF THE CLOCK

I've long been drawn to systems engineering. I started learning Rust before AI coding tools came along, and AI has since unlocked a lot of fun hobby projects: customising Linux distros and researching how operating systems are built.

Rust · Linux distros · OS development
